PRECISION HARVESTING PARTS

Groundhog Industries are an Australian owned family business with a history of supplying high quality, consumable wear parts to the agricultural industry.

Reduce Downtime

By using our hardened pickup tines in conjunction with our poly pickup bands downtime spent changing prematurely worn tines and straightening steel bands can be avoided.

Reduce Replacement Cost

Through innovative design Groundhog Industries products are better value than OEM products.

Longer Lasting Wear Resistant Products

By using the highest grade of hardened steel and quality polypropylene, all Groundhog Industries products have been designed to offer maximum protection from wear and impact.

Longer Lasting Wear Resistant Products

After a customer complained to us about rocks and other objects continually bending his metal pickup bands, we developed our poly pickup bands. Our bands are made from heavy, flexible, high impact poly that will withstand impacts without damage. If pickup tines do rub against the bands, they will not wear through nearly as quickly as with steel bands. In addition, hay feeds through much more smoothly and easily. The ½ inch thick bands have a ¼ inch support ring on the inside to strengthen and maintain shape. Longer bolts (included) are required to attach the poly bands.

Hamish Murray, Big Bale Co - Woodanilling WA

For the last two years I have used Groundhog large square baler and hay rakes pickup tines and I am happy with the durability and value for money. We have also used the poly pickup bands on our Massey Baler and think they are an innovative product.

Chris Browne, Kambra Springs Hay - Wongan Hills WA

We have run Groundhog pickup tines on our Massey Balers for the last two years and have been happy with the price, quality and service. We tried the poly pickup bands and reckon they are a good thing.

Daryl Bishop, Riverland Agricultural Contractors - York WA

Most of our contract bailing is done in straw and we have had a good run out of Groundhog pickup tines on our large square Massey balers. We operate in some fairly rocky conditions and the poly pickup bands will save us time straightening our steel pickup bands.

WARRANTY INFORMATION

As the selection, set-up and use of hay machinery equipment is affected by variables beyond our control, neither the Manufacturer nor any persons employed on its behalf including dealers or agents are liable for any loss or damage, whether consequential or otherwise, resulting from the use of its products. Warranty may / may not apply where any product is used for other than its intended and recommended purpose, or is subjected to pressures, loads or conditions beyond that for which it is designed. Should a product not perform its intended or recommended function, contact Groundhog Industries.
